Diagnosing Mineral Nutrient Disorders in the Landscape 6

Just like humans, plants need balanced nutrition to maintain their health. So how do you know when a plant is suffering?

Not-So-Minor Bulbs 12

Tulips and daffodils traditionally signal the arrival of spring, but there's a wide variety of "minor" bulbs that should get more attention for the important—and beautiful—roles they play.
By Jill Selinger

Trends & Blends 18

Combining compatible colors of tulips can offer that "wow" factor we've all been looking for.
By Eric Olson

Get the Job Done 26

No matter the task at hand, the right piece of equipment can mean the difference between a job done and a job *well* done.
An American Nurseryman Report

On the cover:
Not so fast! This sweetgum is not displaying fall color; it's struggling with a case of iron chlorosis. Learn how to identify nutrient deficiencies in the landscape on page 6.
